

ANDERSEN

DESIGN SINCE 1916

## ANDERSEN – DESIGN SINCE 1916

At Andersen, we believe in curiosity, innovation and talent. With passion, we design contemporary furniture and interiors for modern homes. For more than 100 years, we have created design products that have distinctive character and a clean Scandinavian expression. With our Scandinavian roots, we have developed a collection that reflects a modern Nordic style combined with international appeal.

The beauty of home is in the details. Created by the symbioses between design, function and craftsmanship. Where creativity unfolds and uniqueness takes shape. Catches the eye. Invites. Delights.

We care for the environment and have developed a series that is based on social responsibility and sustainability. The MyTree series symbolises the world's trees, with their simple and elegant expression.

Plant a tree – Andersen has entered into a collaboration that works towards a better environment through the reestablishment and expansion of forest areas around the world. My Tree is accompanied by a certificate with the location of the project, where you have assisted in planting a tree and in doing so helped the global climate.

A-PLANT STAND

Andersen has relaunched a classic and elegant series of wooden figurines, originally designed in 1958 by the renowned modernist Danish designer Jacob Jensen. The series is called The Vikings of Denmark, and comprises Vikings in different sizes and with different appearances.

The Vikings of Denmark are perfect for decorating any home. The sleek lines that characterise Jacob Jensen's creations are clearly visible in these figurines. With their three sizes, the Vikings contrast well with each other and celebrate the diversity that existed then and still exists today.

However, the series is not just for decoration. The wooden figurines' heads and weapons can be disassembled and reassembled in different ways or can be spread out on the battlefield, ready to encourage imagination and play. This way, The Vikings of Denmark, who have brought joy to many homes for generations, have been revived and are ready to fight new battles. The giftboxes have been kept in the original style, illustrating Viking longships, so they can be included in play as well.

Good taste in the kitchen is more than flavours, ingredients and recipes. It is also about attracting the eye. Adding an aesthetic dimension by presenting any snack or dish in the most tasteful way. Seasoning life. Everyday.
