NEWS  
Autumn / Winter 2026

# Welcome to Our AW26 News Catalogue

As autumn settles in and the pace of the season slows, we present our Autumn/Winter 2026 News Catalogue - created with a focus on versatility, atmosphere and strong commercial appeal. The collection is defined by organic silhouettes, refined details and a rich palette of warm, earthy tones.

Designed to meet the needs of the season, the range brings together tactile textiles, decorative glass and softly glowing lighting elements that bring the collection to life and highlight its character. Each piece is carefully developed to combine aesthetic value with functionality, offering harmonious options across categories and settings.

Explore the latest additions and discover a collection that supports a considered, inspiring and commercially relevant assortment for the coming season.

## As the season turns: Welcome autumn home.

Broste Copenhagen's Autumn / Winter 2026 Collection unfolds as a story of organic shapes, subtle yet distinctive details and the soft shift of light as days grow shorter.

As the air turns crisp, the home becomes a place to gather, pause and unwind. Warm drinks at the table, layered cushions in calm corners and evenings lit by gentle candlelight shape the rhythm of the season.

Inspired by forest tones, deep greens and warm, earthy shades, the collection brings nature's colours indoors through expressive vases, decorative glass and textured textiles - each design carrying a subtle, crafted element that adds character.

Across rooms and settings, natural textures and thoughtful details create a sense of calm continuity. Soft rugs ground the space, lanterns and sculptural candle holders add depth and glow, while patterned napkins and tableware turn everyday meals into slow, shared moments.

Create contrast or keep everything softly aligned.

**Broste Copenhagen - Home is where the B is.**

Slow mornings, warm cups and soft fabrics. Small rituals that make the season feel cosy.

Gentle light through glass,  
with reflections shifting  
throughout the day.

Soft tones settling indoors. A gentle mix of glass, stoneware and woven details

An invitation to linger.  
Warm light, rich tones  
and spaces made for  
slowing down.

When the air turns crisp,  
let the home feel warm.  
Candles, ceramics and  
quiet moments.

As leaves fall outside,  
bring warmth indoors.  
Soft textiles, glowing  
candles and quiet  
corners to settle into.

A season to turn inward. Wrap up in cushions, warm colours and the calm of soft shadows.

Let the home glow. Lantern light, natural textures and layers that invite you to stay a little longer.

## Wide Vases

A beloved favourite, now in a trending teal finish. The bestselling Wide Vase is made from ceramic with a glossy reactive glaze that brings depth and subtle movement to the surface. The new colour adds a rich, autumn-ready note, while the shape's soft curves and sharp lines keep it timeless. Available in four sizes and six additional colours. Beautiful on its own, or mixed and matched for a layered, considered look.

#### AMELIA DECO PLATE

**Item:** 70410029

**Size:** Ø25 x H2,5 cm

**Sales Unit:** 2 pcs

**Giftbox with 1 pcs**

**Color:** Brown

**Material:** Marble

**Care:** Do only hand wash your marble piece with mild pH-neutral dish soap. Harsh polishing and acidic cleaners will damage the surface

1003425    4003740  
2034835    5003665  
3022990    6037690

## Amelia Deco Plate

The Amelia Deco Plate is made from brown marble, where soft veining and natural colour shifts give each piece its own quiet expression. Use it as a centrepiece on the table, for candles and small objects on a sideboard, or simply display it as a calm, sculptural detail in the room.

## Shelly Candle Holders

Coastal glow. Subtle patterns inspired by seashell forms give the Shelly Candle Holder a quiet, tactile character. Finished in white cream ceramic with a soft reactive glaze, each piece features one of two delicate motifs. A gentle detail for creating warm light and a relaxed, coastal-tinged mood without taking centre stage.

## Pina Candle Holders

Drawn from shapes found in the forest, the Pina Candle Holder has a form reminiscent of a pinecone, finished with a soft reactive glaze. Available in ocher or white cream, and in two sizes. Each piece carries subtle shifts in colour and texture, bringing a warm, natural touch to shelves, tables and quiet corners throughout the season.

## Otis Hurricanes

Light and shadow come into play with the Otis Hurricane. A clear glass holder for pillar candles sits inside a black metal frame, where fine, string-like lines form a delicate pattern.

When lit, it casts a soft, shifting glow across tables and floors. Available in two sizes for creating a calm, harmonious atmosphere indoors or out.

## Amor & Ginkgo Biloba Paper Napkins

Add a graphic yet heartfelt touch to your table. These decorative paper napkins come in two designs: bold, nature-inspired Ginkgo Biloba leaf patterns and simple, heart-inspired motifs. Available in various seasonal colour combinations, they bring colour, contrast, and a soft sense of warmth to the table. Perfect for both everyday meals and special occasions, and easy to pair with matching candles for a stylish, harmonious finish.

# ABOUT OUR PRODUCTS

## Bamboo and Rattan

Rattan and bamboo are natural and beautiful imperfect materials with unique and inevitable colour variations, markings, grains, and dents that does not influence the product's durability, strength, or lifespan. The handmade nature of rattan and bamboo lamps, baskets etc. means that no two pieces or sides of the same piece are alike.

Please note that rattan or bamboo can become brittle or damaged when exposed to heat or moisture. Caring for the material will keep the material last for years. The item should be regularly dusted or vacuumed using an upholstery brush and low suction. When necessary, a more thorough cleaning can be done with a damp cloth. Any food, drink, or mud stains should be cleaned away immediately with mild soap. Please ensure not to soak the material.

We advise against leaving rattan or bamboo exposed to the elements when not in use. Store them in a dry and ventilated space during the winter months to prolong their lifespan.

## Ceramics

All our dinnerware and decorative items made of stoneware, porcelain, clay or ceramics are finalised by hand. The craftsmanship gives every item minor, beautiful irregularities in the form, the tone and the glaze colour. The variations of the product remind us of the authenticity of the production of our tableware.

## Porcelain and Stoneware

We use stoneware and porcelain clay in our dinnerware series and we love the contrasting expression of the denser and stone-like quality of the stoneware and refined porcelain. The main difference between the two types of clay is that stoneware is more dense and less porous than porcelain. Stoneware is fired at approximately 1100-1250 degrees and retains more water after firing than porcelain, which can cause it to become hot during use. Porcelain, with its light, almost translucent "shell-like" appearance, is fired at very high temperatures ranging from 1200-1450 degrees. When porcelain is fired, it develops a smooth and hard structure. Both materials are robust and long-lasting, each with its own unique appearance and tactile qualities.

## Reactive glaze

Reactive glazing is our most cherished glaze because its variegated coloring lends each piece a subtle uniqueness. The final finish is unpredictable due to the non-formulaic firing process in the kiln. As a result, no two pieces of reactive glaze dinnerware are alike, each possessing its own distinctive traits and nuances.

The detailing of our glazed products is made by hand, making each piece unique.

## Dishwasher

All our tableware series are dishwasher safe. Quality control and testing have been conducted at 65°C and are therefore recommended. We also recommend unloading the dishwasher once it has cooled down to avoid chipping.

## Microwave

All our tableware is microwave safe. However, an effect above 675 Watt can overheat and damage the item and is not recommended.

## Oven safe

Our ovenware is safe up to 250 degrees Celsius. Please refrain from subjecting it to sudden temperature fluctuations. Take caution, as ovenware items may break if exposed to rapid changes in temperature, such as transitioning from a hot oven to a cold countertop. Note that our tableware collections made of stoneware and porcelain are not suitable for oven use.

## Freezer safe

Our ovenware is safe to use in temperatures as low as -18 degrees Celsius. Avoid abrupt temperature shifts to prevent breakage. Exercise care, as ovenware products may fracture if swiftly transferred from the freezer to a preheated oven. Our tableware collections made of stoneware and porcelain should not be placed in the freezer.

## Marks, scratches and stains

Plates and bowls will get cutlery marks and small scratches of usage. Especially unglazed and matt glazed surfaces are even more sensible compared to normal and glossy ceramic surfaces. Neither are perceived as production faults. The marks can to some extent be removed with Vienna chalk on white items or polishing material for glass ceramic cooking plates, but please remember to follow the instructions for use carefully.

## Crazing glaze

Crazing refers to a network of fine hairline cracks that develop on the surface of the glaze. Tableware typically consists of a ceramic body covered with glaze, and when changes in conditions affect the body more than the glaze, crazing can occur. Exposure to moisture, such as soaking, can cause the item to expand or contract, leading to crazing. Additionally, repeated heating or cooling, as well as use in a microwave or dishwasher, can contribute to crazing over time.

Crazing may result from:

- sudden fluctuations in temperature and humidity
- exposure to moisture, especially if soaked
- being bumped or moved around

Crazing typically occurs with age, which is why you often find crazing on vintage and antique items more frequently than on new ones. However, crazing in glaze is not considered a production fault.

## Cutlery

Our cutlery will serve you for years to come with proper care and use. Stainless steel needs to be understood by its name. Not stain-free, but stains less, and by stains, we mean rust. No steel alloy is 100% resistant to all the food or chemistry in our kitchen. It can erode the surface and cause rust stains. So please be aware that food acids found in ketchup, mustard, egg, lemon, etc. and ferrous and chlorinated water can attack steel and cause rust stains. Therefore, we recommend that the cutlery is rinsed or washed immediately after use.

Most of our cutlery is dishwasher safe but as with all cutlery, be careful using aggressive dishwasher detergents. We know it's more convenient to use the dishwasher than washing by hand, but it won't risk shortening its colour or lifespan.

Our cutlery ranges are manufactured from 18/8 + 18/0 chrome /nickel steel for the forks and spoons. To ensure the sharpness of our knives, we use special 13/0 chrome steel with carbon. You may therefore find that the blades are more susceptible to rust.

## Fiberclay

Fiberclay is an excellent material for outdoor furniture and planters. By combining cement with fibres, it offers the solid appearance of concrete while remaining lightweight and easy to move.

As part of the manufacturing process, minor surface variations such as subtle texture differences, small pinholes, or tonal inconsistencies may occur. These are natural characteristics of fiberclay and should not be considered defects, as they do not affect the strength or functionality of the product.

As a natural material, fiberclay may also develop slight colour variations over time as it weathers under different conditions.

In the event of minor cracks, the surface can be lightly sanded and treated with stone wax.

Please note that fiberclay is not frost-resistant and should be stored in a dry, frost-free environment during the winter months.

## Glassware

Most of our glassware is mouth-blown, a traditional technique that remains widely practiced today. This process involves heating liquid glass and placing it into a mould, where a skilled glassblower shapes it using a blowing pipe. Creating a mouth-blown series that achieves consistency and uniformity requires expert artisans.

## Air Bubbles

Each glass has its own character, with slight variations in colour, size, thickness, and the presence of tiny bubbles.

Air bubbles are a natural and unavoidable feature of mouth-blown glass. During production, small amounts of air can become trapped in the molten glass, particularly between layers formed as the piece is shaped. Due to the handcrafted process, it is not possible to eliminate these inclusions entirely.

These bubbles are a hallmark of artisanal manufacture and should not be regarded as defects. Rather, they enhance the individuality and authenticity of each piece.

## Dishwasher

Our glasses are dishwasher-safe, and we suggest using the glass program or temperatures below 55 degrees Celsius to prevent glass etching. When loading the dishwasher, place the glasses well-spaced apart to avoid contact with each other or other objects. If available, utilize a stemware rack for added support and stability. After the washing cycle is complete, promptly remove the glasses from the dishwasher or open the lid to prevent the buildup of steam, which may contribute to glass degradation.

## Oiled Oak

Hand-wash kitchen accessories crafted from oiled oak. Following use, gently cleanse with a small amount of dishwashing liquid, rinse under hot water, wipe dry, and let air-dry in an upright position. To prevent cracking, drying, or warping, periodically apply oil to keep the boards nourished, thereby preserving their antimicrobial properties.

## Lacquered Veneer

Lacquered veneer enhances the individuality of each surface with unique grain patterns, adding to the wood's charm. When it comes to safeguarding the surface, it's important to be mindful of moisture, heat, and sunlight. Any spilled liquids should be promptly wiped away. For stain removal, use a mild detergent followed by a rinse with clean water. Avoid harsh detergents or products containing abrasive powder, as these can dull, scratch, or damage the surface. Additionally, it's crucial to shield the surface from heat or steam generated by hot plates, as this can gradually weaken the adhesive bonding the veneer to the underlying surface. Prolonged exposure to direct sunlight may result in fading of the surface color.

Lacquered veneer is intended for indoor use only.

## Lamps

All lamps are CE approved and suitable for 220-240 volt. Table and floor lamps have a two-pin euro plug. For indoor use only.

## Marble

Marble is a stunning material with natural variations making each piece unique. We recommend hand-washing marble cutting boards with a mild dishwashing liquid and a soft sponge. Marble is not suitable for dishwashers or exposure to drastic temperature changes, as it can cause cracks. Please use a knife carefully on marble cutting boards as it can damage the knife and scratch the cutting board's surface.

## Candles

Broste Copenhagen has a long tradition of producing candles with the best manufacturers in Europe. We use modern quality standards as a benchmark for all our candles. We work exclusively with selected raw materials such as fully refined paraffin wax, high-grade stearin, and pure cotton wicks in our production. We are committed to having our candles tested by neutral and independent product testing services to maintain our position.

All our candles are made without palm oil.

Our candles are tested according to the three EU norms:  
EN 15493 specifications for fire safety  
EN 15426 specifications for sooting behaviour  
EN 15494 specifications for product safety labels

Additionally, to consistently ensure the high quality of our candles, our in-house quality management continually controls both finished candles and raw materials. All test results are documented accordingly. Reliable quality and continuous product development and improvement are the basic principles we have committed to throughout the years.

### Scented Candles

All scented candles are made from soy wax - a processed form of soybean oil. Soy wax is a natural wax made from a renewable and eco-friendly source. Burning soy candles does not increase the CO<sub>2</sub> level in the atmosphere.

NEVER LEAVE A BURNING CANDLE.

Never leave wick trimmings, matches, or any other material in the wax pool, as these can create a fire hazard.

Please always trim the wick to 1 cm before lighting the candle, and make sure that the wick is upright.

Pieces of wick that have been cut off or other items that fall into the candle wax can re-ignite, causing the candle flame to become much larger than is safe, even if it is in a container.

Dispose of all packing materials or foreign matter before lighting a candle. Some of our candles have a paper band wrapped around them or a wicked tag. Make sure to remove any of these items from your candles before lighting them, so they do not catch fire.

The wick is made so that the candle burns safely. If a wick becomes too short, it will produce a too small flame for the candle to burn correctly. Extinguish the flame and carefully pour off the liquid wax to fix this. Relight the candle and allow it to burn for about one hour. If the flame is still too small, repeat the process until the flame can continue burning the wax it has melted with a regular size flame. Prolonged exposure of candles to a temperature below minus degrees could cause the wax to crack.

## Important information – safety

Do not leave candles in direct sunlight or at temperature below 0 °Celsius. Candles will get damaged under extreme temperature changes.

Warning!

Never leave burning candles unattended.

Keep burning candles out of reach of children and pets.

Keep a distance of at least 10 cm between two lit candles.

Keep lit candles away from flammable materials and keep away from anything that can catch fire.

Trim wick down to a minimum of 1 cm and always trim the wick if candles give off sooty smoke.

Avoid sooty smoke, use a candle extinguisher instead of blowing out the candles.

Always place candles in steady candleholders that will not burn.

Do not place candles in a draught.

Do not leave candle in direct sunlight or at temperature below 0 °C. Candle will get damaged under extreme temperature changes.

Cut the edge of pillar candles down if it gets too high, so the candle burns evenly.

## Maintenance of upholstery furniture

We recommend using tested and approved upholstery care kits for impregnation and stain removal. When vacuuming or spot cleaning, avoid rubbing the fabric too vigorously to prevent pilling.

For non-greasy stains, gently dab the affected area with a sponge soaked in clean, warm water. If necessary, use water and alkaline-free soap for stain treatment, and always rinse with clean water afterward. If unsure, seek professional advice.

Regularly vacuum the furniture using the upholstery nozzle or a soft clothes brush, brushing in the direction of the nap to remove dust and prevent fluff and pilling.

Fabric upholstery should not be exposed to direct sunlight, as some fabrics may fade faster than others. As a general rule, synthetic fibers and light colors tend to fade less, making them a better choice for furniture exposed to sunlight.

Wool fiber is a natural material known for its exceptional properties, providing warmth and comfort. It is also durable, elastic, and naturally dirt-repellent due to the lanolin present in the wool. Initially, wool may shed some excess fibers from the surface, known as pilling. However, this does not impact the quality of the material; instead, it signifies its natural and high-quality nature.

Polyester fiber, on the other hand, is durable and easy to maintain, making it an ideal choice for areas with heavy wear. Trevira CS fiber is a flame-retardant polyester that boasts a strong environmental profile.

Velour fabric may become wrinkled or crumpled during transportation or prolonged use. To restore its appearance and revive the pile, steam can be applied using an iron or steamer from a distance of 2-3 cm. Afterwards, gently comb the fabric with a soft brush in the direction of the pile.

### Martindale

Martindale is the standard measure of durability. For heavy usage, abrasion resistance (Martindale) should exceed 20,000, while for everyday use, a rating of 10,000 or higher is sufficient. Our curated selection of fabrics ranges in abrasion resistance from 20,000 to 120,000 Martindale. Fabrics with a Martindale rating exceeding 80,000 are suitable for commercial/public use.

### Lightfastness

Lightfastness refers to a textile's capacity to maintain its color when exposed to light, rated on a scale from 1 (poor) to 8 (excellent). Lower lightfastness indicates a higher likelihood of color fading over time.

### Pilling

Pilling refers to the degree to which fibers accumulate on the surface of the textile, forming small balls or lint, known as bobbles. These bobbles can appear due to factors such as wear, dirt, or the use of inappropriate cleaning agents. Pilling is rated on a scale from 1 (poor) to 5 (excellent).

## Our labels

### Nordic Swan

The Nordic Swan is the official eco-label of the Nordic countries, ensuring products with minimal environmental impact and products checked for unhealthy and harmful substances.

### FSC®

When you choose FSC® as a consumer or business, you are helping to ensure the natural and social working conditions in the forests that the wood origins. In an FSC® forest, there are only felled as many trees as the forest can manage to reproduce. FSC® is the environmental standard for responsible forest consumption. Please look for the FSC logo on our FSC certified products.

### Global Compact

We are pleased to confirm that Broste Copenhagen reaffirms its support of the Ten Principles of the United Nations Global Compact in Human Rights, Labour, Environment and Anti-Corruption. Please visit [www.brostecopenhagen.com](http://www.brostecopenhagen.com) for more info.
