

# COLOUR GUIDE 2023

## SERENE - THE AUTHENTIC

Leather SERENE is a very durable type of leather and differs from other LIND DNA qualities by being softer and more flexible, without compromising on strength and durability. The combination of these qualities makes SERENE stand out as our most authentic, high quality, leather type, which is very easy to clean due to a durable sealing coating. The material is 1,2 mm thick and consists of 80% core leather and 20% natural rubber.

## NUPO - THE SOFT

NUPO is one of our most popular structures. It has an exclusive, suede-like surface, with a soft structure. NUPO is elegant and timeless - the perfect choice for almost any interior style. The material is 1,6 mm thick and consists of 80% core leather and 20% natural rubber.

## REVERSIBLE - 2 IN 1

From quiet morning coffee to vivid weekend gatherings with friends and family, our unique reversible structure will turn your dining table into a playground with endless possibilities of expressing your unique personality - just turn your table mats over to create a new look, colour and setting to match the occasion.

## BUFFALO - THE RUSTIC

With its large and natural looking pattern, Buffalo is an unspoiled surface, that brings a perfect foundation of rustic style to your table. Alternatively, it can beautifully balance out a more sophisticated table setting in a grounded and understated way. The material is 2 mm thick and consists of 80% core leather and 20% natural rubber.

## BULL - THE STRONGEST

Bull is one of LIND DNA's strongest structures. The slightly thicker structure makes the material incredibly durable and easy to maintain. With a small, fibrous pattern, the surface has a classic leathery look. Bull is soft, durable and conveys a slightly polished look. The material is 2 mm thick and consists of 80% core leather and 20% natural rubber.

## LACE - THE EXTRAVAGANT

Lace is a half-glossy, half-matte, extravagant surface inspired by premium lace fabrics – the recognizable and playful structure will make a beautiful statement in any table setting. The material is 1,6 mm thick and consists of 80% core leather and 20% natural rubber.

## CORE - THE NATURAL

CORE is our purest and most natural recycled leather quality. With no colour or embossed structure, the granulated core leather is allowed to shine through, leaving a natural flecked pattern across the surface that makes every mat in the CORE collection appear completely unique. Although the core leather is granulated and mixed with natural rubber, it remains a living, changeable material that beautifully patinates over time. The material is 1,6 mm thick and consists of 80% core leather and 20% natural rubber.

## DESIGNED TO LAST A LIFETIME

Sustainability runs deep in our veins and has been an essential part of our corporate DNA since the very beginning. That is why we create interior accessories and table mats in recycled leather that are timelessly designed, incredibly durable, and crafted in sustainable and uncompromising materials.

To assure you that your LIND DNA table mats truly will endure the test of time, we are proud to offer lifetime guarantee on our entire range of table mats and to set new standards for your table setting.
