C O P E N H A G E N

A curated selection of our newest styles, thoughtfully gathered in this catalogue

The new collection from 101 Copenhagen is inspired by the quiet resonance found within nature - the way colours soften under sunlight, how stone and wood becomes textured through time, and how natural materials carry depth, warmth, and memory within them. Drawing references from deep forest greens, desert earth, weathered minerals, and ancient handcrafted objects, the collection explores the connection between nature and contemporary living. Through sculptural furniture, tactile upholstery, and richly glazed ceramics, organic forms and natural materials come together in a colourful, yet harmonious palette. Soft textures, warm wood tones, and layered surfaces create interiors that feel both serene and expressive. Each piece carries a sculptural presence designed to evoke atmosphere and emotion, inviting a slower, more tactile experience of everyday life.

At the heart of the collection is the introduction of new upholstery fabrics, most notably the luxurious Wool Velvet fabric in three colours: Desert, Rust, and Peat. Inspired by mineral landscapes, burnt earth, and aged organic materials, the fabrics bring warmth and depth to selected designs within the Toe, Foku, Hiro & Nama collections. Alongside this, a new woven fabric Dark Brown expands the tactile universe with a refined and timeless character. Subtle colour variations shift in the light, creating warm and inviting interiors. Expanding the Toe collection, 101 Copenhagen introduces the Toe Sofa and Toe Chair Armrest, where softness meets architectural precision. Defined by a plank-like armrest inspired by the iconic Brutus Chair, the designs reinterpret brutalist forms in a softer expression. The Bow Console is now introduced in wood, preserving its architectural arches while gaining warmth through natural oak grain. Meanwhile, a new signature finish, Classic Brown, is applied to lacquered oak, adding depth and warmth to the collection. Paired with Aniline Black Leather, the Nama Dining Chair and Lounge Chair take on a more refined and timeless character. Ceramic developments continue the natural narrative with earthy tones such as Almond, Dark Chocolate, Rose, and Maroon, alongside a deep glossy Dark Green inspired by ancient ceramics. Marrakech Blue forms a bold contrast - inspired by Moroccan architecture and sun-faded walls.

Together, the collection reflects 101 Copenhagen's ongoing fascination with sculptural forms, tactile materials, and timeless craftsmanship - rooted in nature, yet shaped for contemporary living.

A QUIET JOURNEY INTO FORM, SPACE, AND INTENTION /

Step into the world of 101 Copenhagen, where timeless design and modern refinement exist in quiet balance. A place shaped for those who create spaces and experiences, architects, designers, and retailers seeking not only objects, but a deeper sense of direction.

Access begins with a simple gesture. By scanning the QR code, the door opens to our professional universe, a space defined by clarity and intention. Here, catalogues, press materials, and brand assets unfold alongside a complete image bank of high resolution visuals, campaign stories, and detailed product knowledge. Everything gathered, everything within reach, supporting a seamless creative flow.

In the heart of Copenhagen, our three floor showroom invites a slower rhythm. Light, material, and form meet in calm harmony, where Scandinavian clarity aligns with Japanese stillness. Visits are by appointment, allowing each moment to be experienced with presence and quiet focus.

On the 2.5 floor, furniture stands with a sense of ease. Clean lines and natural materials come together in pieces designed for modern living, where function and form feel naturally connected. Moving upward, the third floor reveals vases and lighting, thoughtfully composed so that shadow and light can gently shape the atmosphere. Each object holds its place with purpose.

At the top, the fourth floor brings together both showroom and design studio, where ideas take shape and evolve. Here, our dinnerware collection is presented with quiet refinement, while the rooftop terrace offers a moment of stillness above the city's rhythm. This is more than a showroom. It is a space to slow down, to observe, and to reconnect with the essence of design. A place where beauty and function exist in quiet harmony.

Let the QR code remain your point of return, a simple path back into the 101 Copenhagen universe, where inspiration continues to unfold.
