LIND DNA DISPLAY SOLUTIONS

We offer a complete commercial concept – a unique product range, locally produced packaging and a professional in-store product presentation.

We have developed a large variety of in-store solutions for retailers – different displays and shop-in-shop solutions that beautifully and presentably display our products. Our displays are space-saving and ensure the highest turnover per square meter. At the same time, our in-store solutions create transparency, so it is easy to see which products need reordering.

Our display solutions are used in many different types of stores and can be adapted individually, according to need.

Their design is specially conceived with a focus on the presentation of our collection in the most effective manner while inspiring end-users in the store and helping them find our products easily. Based on minimum order values, we offer our business partners the in-store material free of charge.
