@linddna

With a strong passion for responsible, natural materials, we design and produce in Denmark. With quality in focus, most of our designs are carefully crafted incorporating OEKO-TEX® certified recycled leather as a fundamental component. A unique material that offers boundless design opportunities, remarkable usability, and a quality and finish, that lasts a lifetime. Whether developing products for use in private homes, hotels, restaurants, or office spaces our products

offer timeless design with Nordic aesthetics and function in mind. We want to challenge the perception of timeless design while demonstrating what new and exciting things are possible within interior design. Without compromising the possibility of pushing against conventional norms, we are using a few carefully selected materials. Unnecessary elements are trimmed during the design phase, as we believe wholeheartedly in the timelessness of simplicity and responsible materials.

DK

CRAFTED IN DENMARK

All LIND DNA recycled leather designs are crafted in Denmark, ensuring unprecedented quality in every step of the production process.

RECYCLED LEATHER

Environmental consciousness is at the heart of the LIND DNA strategy. Our recycled leather is made from 80% recycled leather and 20% natural rubber.

CUSTOMIZATION

Our in-house design and graphic team combined with our extensive range of colours provide great flexibility in supporting special customization ideas from our customers.

FLEXIBILITY AND FAST DELIVERY

Due to local production, delivery time is short for both customized and standard orders, which ensures the highest degree of flexibility.

EASY TO CLEAN

The distinctive blend of recycled leather and natural rubber creates a robust and enduring material that is effortlessly maintainable, retaining its aesthetic and qualities over prolonged usage.

MENU, WINE AND PAYMENT FOLDERS

On the following pages we present our various collections of Menu, Wine and Payment Holders. All products in these collections are made from recycled leather and our wide colour palette enables you to match the collections to your complete table setting with beautiful colours and functional details that will impress your guests.

We design and produce at our own production facilities in Denmark, which secures a high level of quality and flexibility. This makes it possible for us to customize the products to your wishes and needs – and we take pride in inspiring you with new, unique designs.

OSLO A5 AND OSLO TALL FOLDERS: CLAY BROWN / NUPO, CAVIAR / NUPO

CORE LEATHER

The recycled leather, we use in our designs, originates from vegetable-tanned core leather sourced from surplus production in the furniture and fashion industry — such as leftover pieces of leather from the production of a sofa or shoe soles. The fact that the leather used is vegetable-tanned means, that only plant-based liquids have been used in the tanning process, which is a more sustainable method, that also enables the recycling of the leather.

GRANULATE

The vegetable-tanned core leather is granulated into tiny pieces, transforming it from a solid piece of leather into crumbs that feel soft and lightweight to the touch. This granulate is mixed with natural rubber from trees in a ratio of 80% core leather to 20% natural rubber, and then pressed to create recycled leather.

RECYCLED LEATHER

From core leather to granulate to recycled leather. This process has been carefully developed to create a unique material offering remarkable versatility, easy maintenance, and a lifetime of durability. Also, a material that, during the process, grants us the opportunity to explore boundless design possibilities in terms of colours and textures. Both water-based colours and textures are developed with a focus on creating an organic, natural expression and colour interplay, that stays true to the natural material.

We design and produce at our headquarter in Denmark. With our direct involvement in production, we have the flexibility to tailor our products to individual needs and preferences. This grants us the ability to create unique, personalized solutions that meet your specific desires and requirements.
